Influenza Surveillance Report Week 1: January 3rd – 9th, 2010

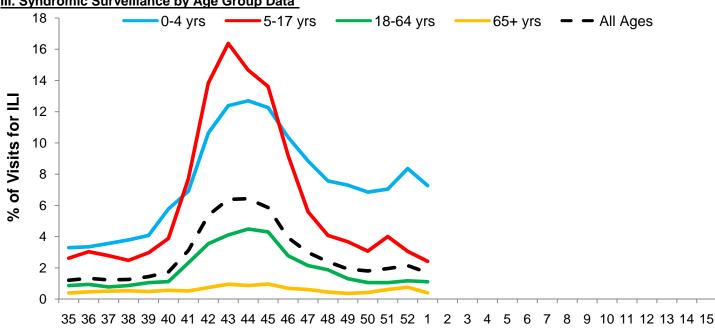

I. Influenza Summary to Date

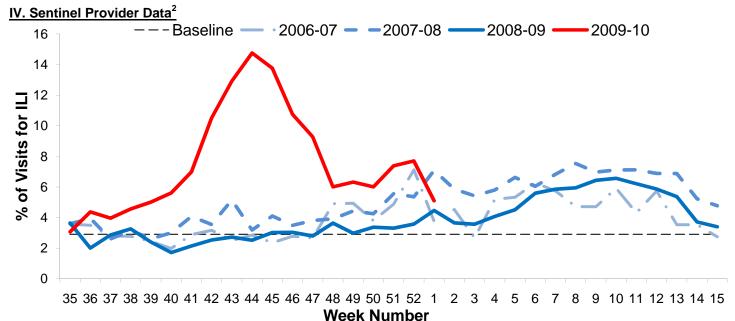

Influenza surveillance for suburban Cook County** involves the weekly collection of data from a sample of hospitals, private physician's offices, and laboratory data. Our sentinel participants reported the following aggregate measures: Syndromic Surveillance: 1.76% ILI¹, Sentinel Sites: 5.10% ILI². Fourteen (2.46%) specimens tested by participating laboratories³ were positive for influenza, of which 100% of sub-typed influenza A viruses were 2009 H1N1. The current level of influenza activity is typical for this time of year. To date, suburban Cook County has had 582 hospitalized cases of confirmed 2009 H1N1, 16 2009 H1N1 deaths (14 adults, 2 pediatric), and 1 pediatric influenza A (unsubtyped) death. During weeks 52 and 1, seven 2009 H1N1 hospitalizations were reported to CCDPH. Thank you to all of our surveillance partners for their help in collecting this information.

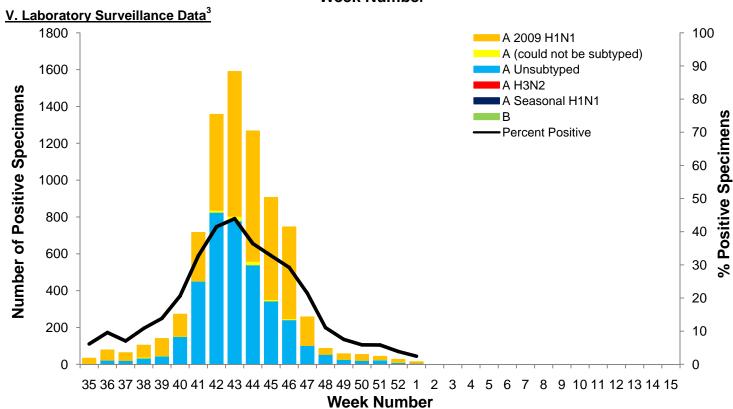

III. Syndromic Surveillance by Age Group Data¹

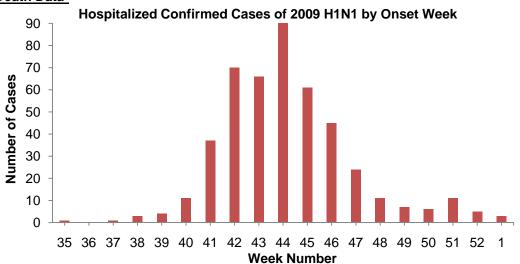

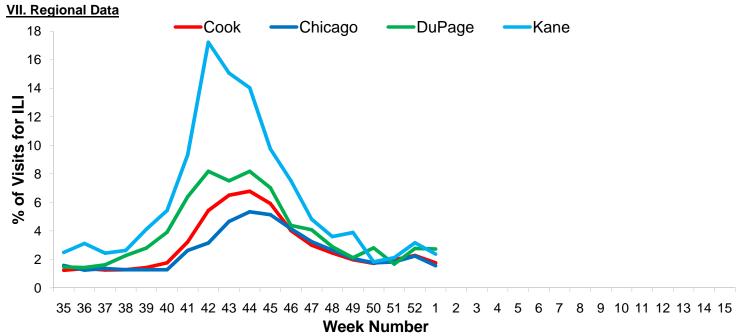

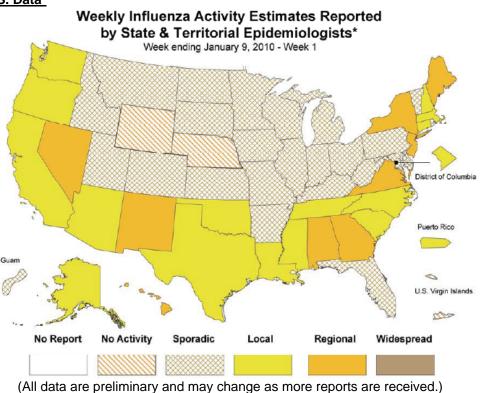

VI. 2009 H1N1 Hospitalization and Death Data⁴

Hospitalized Case Counts	#
Total Cases	582
Total Deaths	16
Incidence by Age	#
0-4	93
5-24	169
25-49	174
50-64	106
65+	39
Incidence by Region	#
North	207
West	152
Southwest	83
South	138

VIII. Illinois and U.S. Data^{5†}

For further information about influenza activity see: <u>City of Chicago Surveillance Report</u>, <u>IDPH Surveillance Report</u>, <u>CDC Surveillance Report</u>, <u>Distribute National Surveillance</u>.

- 1. Syndromic surveillance influenza-like-illness (ILI) syndrome is defined as a symptom complex fever and cough or sore throat from ESSENCE. 32 hospital EDs participate in ESSENCE. ILI = # of ED visits for ILI / total # of ED visits.
- 2. ILI is defined as fever ≥ 100°F, cough and/or sore throat in the absence of a known cause other than influenza. 5 hospital EDs and 8 physician offices are participating CDC sentinel sites.
- 3. Laboratory surveillance includes viral culture, RT-PCR, and the rapid antigen test. Not all cases are suburban Cook County Residents. Participating laboratories: IDPH, NSUHS, and ACL.
- 4. Hospitalization and death data are only for suburban Cook County residents (excludes Evanston, Skokie, Oak Park, and Stickney). Data includes reported cases for the presented week.
- 5. http://www.cdc.gov/flu/weekly/index.htm
- † No activity: no laboratory confirmed cases of influenza and no reported increase in cases of ILI.

Sporadic: small number of laboratory confirmed influenza cases or a single laboratory confirmed influenza in a single region of the state.

Local: Outbreaks of influenza or increases in ILI and recent laboratory confirmed influenza in a single region of the state

Regional: Outbreaks of influenza or increases in ILI and recent laboratory confirmed influenza in at least two but less than half the region of the state.

Widespread: Outbreaks of influenza or increases in ILI cases and recent laboratory confirmed influenza in at least half the region in the state.
