West Nile Virus Surveillance Report

August 19, 2010

1010 West Lake Street, Suite 300
Oak Park, Illinois 60301
(708) 492-2000
TDD (708) 492-2002

Stephen A. Martin, Jr., Ph.D., MPH
Chief Operating Officer

Mosquito¹ Surveillance:

Week 32: (08/08/2010 – 08/14/2010)	
Number of female <i>Culex</i> mosquitoes tested	12,221
Number of <i>Culex</i> mosquito pools tested	291
Number of positive pools	89
Number of communities with positive mosquito pools ²	66
Cumulative Totals: (05/10/2010 – 08/14/2010)	
Number of female <i>Culex</i> mosquitoes tested	219,015
Number of <i>Culex</i> mosquito pools tested	4,754
Number of positive pools	350
Number of communities with positive mosquito pools	72

1. Includes mosquito surveillance data from Cook County Department of Public Health, Skokie Department of Public Health, Evanston Department of Public Health, North West Mosquito Abatement District, North Shore Mosquito Abatement District, Des Plaines Valley Mosquito Abatement District, South Cook County Mosquito Abatement District, and the Illinois Department of Public Health.

2. Communities with WNV positive pools in Week 32 include: Alsip, Arlington Heights, Barrington, Bartlett, Berkeley, Berwyn, Broadview, Brookfield, Buffalo Grove, Calumet City, Chicago Ridge, Cicero, Country Club Hills, Des Plaines, Elgin, Elk Grove, Evanston, Evergreen Park, Forest Park, Franklin Park, Glencoe, Glenview, Harvey, Harwood Heights, Hickory Hills, Hillside, Hodgkins, Hoffman Estates, Homewood, Justice, Kenilworth, La Grange, La Grange Highlands, La Grange Park, Lansing, Lemont, Lincolnwood, Lynwood, Melrose park, Morton Grove, Niles, Norridge, North Riverside, Northbrook, Northfield, Oak Forest, Oak Lawn, Oak Park, Olympia Fields, Orland Park, Palatine, Palos Heights, Palos Hills, Prospect Heights, River Forest, Rolling Meadows, Schaumburg, Schiller Park, Skokie, Steger, Summit, Tinley Park, Wheeling, Willow Springs, Wilmette and Winnetka.

Dead Birds: No birds were submitted during week 32. A total of 43 birds have been tested, of which 9 were positive.

Human Cases: There are no reported cases of WNV infection in humans.

Risk Assessment

There is a **moderate** risk of human West Nile Virus infection at this time. This is due to the increase in mosquito pools testing positive for WNV coupled with the recent rise in temperatures and dryer weather conditions.

Prevention: When outdoors between dusk and dawn, cover skin with lightly colored loose fitting clothing and use mosquito repellent with DEET, picaridin or oil of lemon eucalyptus. When applying repellent, always follow the directions on the product label. Get rid of standing water around your home in pet bowls, flower pots, old tires, baby pools and toys. Water that is allowed to stagnate for three or four days becomes a breeding ground for mosquitoes. Make sure your doors and windows have tightly fitting screens and repair any tears or other openings. Keep weeds and grass cut short and keep gutters clean and free of debris.

Disclaimer: All data are preliminary and may change as more reports are received.
