*Rates per 100,000 population per year.

Table 3. North District: In 2009, there were 59 reported cases of TB from North District municipalities (rate: 5.2 per 100,000 population). Ninety percent (90%) of municipalities with more than two reported TB cases were located in the North District. Skokie had the largest number of cases reported (n=8), followed by Des Plaines (n=7) and Hoffman Estates (n=5). Evanston, Morton Grove, Mount Prospect and Palatine had 4 TB cases each in 2009.

West District: There were 19 reported cases of TB in West District residents (rate: 3.2 per 100,000 population). The average rate in the West District was less than the county average of 4.0 per 100,000. High rates in some West District municipalities resulted from relatively small populations in those municipalities versus increases in reported TB cases.

*Rates per 100,000 population per year.

Table 4. South District: There were 13 reported cases of TB in the South District residents (rate: 2.7 per 100,000 population). The rate in the South District was below the average rate of 4.0 per 100,000 population in suburban Cook County in 2009.

Southwest District: There were 9 reported cases of TB reported in Southwest District residents (rate: 2.4 per 100,000 population). The rate in the Southwest District was below the average rate of 4.0 per 100,000 population in suburban Cook County. The municipality with the largest number of reported TB cases in 2009 was Oak Lawn (n=3, rate 5.4 per 100,000).

TECHNICAL NOTES

Surveillance Methodology

Healthcare providers and laboratories in suburban Cook County are required to report the following results within 24 hours: (1) sputum or tissue smears positive for acid-fast bacilli (AFBs); (2) cultures positive for *Mycobacterium tuberculosis*; (3) mycobacterial drug susceptibility results; (4) any other tests positive for *Mycobacterium tuberculosis*. In addition, confirmed TB cases must be reported to CCDPH within 7 days.

TB case reports are entered into I-NEDSS and provide the basis for the information presented in this report. This report includes all cases of tuberculosis reported during the year in which the case was confirmed. Confirmed TB cases who may have moved into suburban Cook County from another jurisdiction are not reflected in the data presented herein; such cases are counted in the jurisdiction that reported the case. Likewise, confirmed TB cases reported in suburban Cook County who may have moved out of suburban Cook County are included in the data presented herein.

Reported TB Case Rates

Suburban Cook County, Chicago and Illinois TB rates between 1993-1999 were calculated using 1990 census data. Suburban Cook County, Chicago and Illinois TB rates between 2000-2009 were calculated using 2000 census data. National TB rates were calculated using national intercensal estimates.
